

## PERFORM brings your animals in top condition!

*PERFORM ensures a silky feathering, clean respiratory tract, fast and good moult, increased fertility, an improvement in vitality and health.*

### Target species

Pigeons, aviary birds and fowls

Homeopathy is a therapy based on the ideas of Samuel Hahnemann (1755-1843). This method of treatment uses all kinds of natural herbs and substances. Natural herbs are already used many hundreds of years. There is a lot of literature about the healing properties of herbs. By using enormous dilutions, Hahnemann found a way to make good effective medicines which can be used for many disorders. Also for animals this healing method is a solution. Perform is a nutritional supplement that is derived from this effective health education. Perform is 100% natural and ensures optimal condition of your animals.

### What's Perform?

The basis for Perform is a very fine calcium-rich clay. Not only it contains calcium, but also other minerals and trace elements that are important in the daily nutritional needs of your animals. In addition to this basis, the product contains about 30 different herbs with homeopathic effect which provide very positive effects. When you start using the product you will experience very positive effects on your animals within three weeks .

### Product composition

Clay, pea fibre, herbs, essential oils, cod liver oil, sprouted grains and algae.

### Manual

When you start using Perform it is important to provide the product every day for the first two weeks. Mix one heaped scoop through 1 kilogram of concentrate, for example egg food for birds or laying mash for chickens. In pigeons you mix it through the grain.

After the first two weeks, adjust the doses to once in two days. After a couple of weeks you drop the doses to twice a week. In extra heavy periods, such as during moulting, breeding season of before and after shows, we recommend daily use of Perform. Because it is a completely natural product, you cannot give too much. The first few days, the animals will be somewhat reluctant, but then they will eat the food with Perform just as much as before.

### Perform Natural Oil

Perform Natural Oil is a fully natural oil that can be applied to the food. It contains a bit of vitamin A, D and E, but has no further additions. It can be used to make the food for pigeons a bit greasy, so the Perform powder is easier to remain stuck. If necessary, it can be added to the food every day, in a dose of 30 drops per kilo.

### Packing

Perform powder is available in jars of 175 grams, 350 grams and 1000 grams. A measuring spoon is included in each jar. Perform Natural Oil is packed in a 100 ml bottle with a handy cap with which you can dose easily drop by drop.

### Satisfaction guarantee

We sell Perform powder with satisfaction guarantee. Try Perform powder for one month. If used as directed and you are not satisfied, you receive a 100% refund.
